

# GRANITUM BASIC

## RESINOUS MORTAR

Distributed in sacks containing only inert material paired with the resinous component which allows it to harden.

Available in:  
Inert- 25kg sack  
Resin- 23kg liquid

Natural granulometric blend to mix with liquid resin, used for coating polystyrene (EPS), polyurethane and horizontal or vertical cement surfaces.

Can be applied by spraying if using the recommended D5 Italia spraying machines or a standard paint-spraying nozzle, if of the right size, connected to a compressor.

**GRANITUM BASIC** can be spread if using D5 Italia spreading machines.

**GRANITUM BASIC** guarantees excellent adhesion to the surface, elasticity and fluidity in any kind of environment.

The finished structures result natural and very resistant, while maintaining a very good degree of flexibility.

**GRANITUM BASIC** mortars can be colored by using any kind of water based or acrylic paint.

*We protect your world, with innovation...*

## RESINOUS MORTAR

Granulometrically variable formulas consolidated by resinous aggregates.

GRANITUM mortars are the most advanced system on the market to transform and strengthen panels, structures, EPS scenery. GRANITUM mortars, when used alongside D5 Italia's spraying machines, can be applied on any type of brick.

Particularly indicated for restoring rapid reticulation plaster, no crumbling even if temperatures vary. Specific formula which makes application simple even in high temperatures maintaining its fluidity.

- » GRANITUM mortars maintain their characteristics in any kind of atmospheric condition if properly treated with protective paint
- » GRANITUM mortars can be used both indoors and outdoors
- » GRANITUM mortars maintain their characteristics over time if properly treated with protective paint

D5 Italia Srl is available by appointment for direct demonstrations of operation and use at our premises

[D5 Italia Srl it is ready to satisfy every technical and specific request on the machine](#)
